FEATURES

Why is Sentinelle such a hit with homeowners? It's all in the details...

- Robust injection-molded Synflex® resin structure
- Steel walls finished with Duratex 2000® anti-corrosion paint
- Internal walls protected against humidity and chemicals
- Curved Synflex® resin top seats
- Resin rails with integrated connecting plates
- Precision-adjusted components
- Fantasy-frieze interior liner
- Easy to assemble

WALL TREATMENT

Real fortress, the wall is made from alkaline cleaned steel with hot dipped galvanized coating especially treated for durability for years of dependable corrosion free use. Treated with 14 coatings and made from corrugated steel increasing its strength and resistance to resist all environmental factors and shocks. Duratex 2000® plastic coating developed for the automobile industry will preserve the look of the wall; pool main component. Inner surface of the wall is treated with a special polyester resin coating resisting humidity and chemical infiltrations between the wall and the liner.

AQUA LEADER

Sentinelle

Stella wall

AQUA LEADER

What makes us a leader is what sets us apart.

What makes Aqua Leader pools stand out is the way we combine unique design quality with practicality, using innovative styling to create smooth round or oval aboveground pools with absolutely no angular joints. We also owe our success to distinctive world-class components that make all the difference, including textured walls, ultra-strong uprights and top rails, solid joints and continuous-curve top seats. At Aqua Leader, we know how important it is to strike the perfect balance between function and aesthetics... and we have leading pool designs in every market niche to prove it. But that is what you would expect from a company that has been totally committed to research and development in pursuit of the perfect pool since 1975.

At Aqua Leader, your family's security is our priority. Always ensure the proper supervision of children when around of a swimming pool.

Sentinelle

Stella wall

Uprights: 6" wide

Pillars of the pool structure, they are reinforced with embossed patterns that insure stabilization of the seats. They have profiled and harmonious designs for better rigidity and a perfect look.

Bottom tracks:

They now come with exterior shields giving them strenght and style while locking the wall into place. The outside surface of the tracks prevent the wall from coming out when the ground heaves.

Wall: 54" height

Color and design: The Stella wall matches the Pearl structure.

Top seats: 9" wide

Their profiled circular form provides superior elegance and sophistication. Curved top seats offer a perfect look and an outstanding rigidity.

Outside connectors:

They perfectly adjusts to the upright heads while insuring the pool with a circular orientation.

Top tracks:

Top tracks are 1-1/4 inch wide. They safely secure the vinyl liner in position and stabilize the wall while insuring its constant circular orientation.

Injection Molding:

All the components of the resin pool structure are molded by an injection process that enables us to reinforce every one of these components (ribbing process), to curve the top seat and also, to use a sturdy snap-on process that eliminates most of the hardware. All resin components are colorfast throughout.

Oval sizes bottom tracks:

The Sentinelle bottom tracks on the oval sizes are different from the true size round pools.

Sentinelle

The only one of its kind...

As the world's first resin pool, Sentinelle played a major role in putting Aqua Leader at the forefront of pool design today. Its ergonomic profile also made it the first truly round aboveground pool, with precision-molded connections that fit together perfectly every time. This is a pool with long-term benefits you're sure to appreciate, its technical and esthetic qualities that will keep you in the swim year after year...
